## What Can Training Look Like?

# WHY Tierney PD?

---

The Tierney PD team believes that professional development cannot simply include training on the use of the device; training must be ongoing and focus on the transformation of teaching and learning. As schools continue to purchase devices for teachers and students to use in and out of the classroom, the need for professional development becomes increasingly important.

Our team would like to bring our instructional technology expertise to your teachers, and we hope to support your ongoing efforts by providing high-quality professional development as your teachers transform their classroom with new technologies.

## Potential Training Topics:
